

ReadLine::getType

```
graph LR; A[ReadLine::getType] --> B[ScribbleCore::getStringType]
```

A diagram showing a relationship between two code snippets. On the left, a gray rectangular box contains the text 'ReadLine::getType'. A dark blue arrow points from the right side of this box to the left side of a white rectangular box on the right. The white box contains the text 'ScribbleCore::getStringType'. Both boxes have a thin black border.

ScribbleCore::getStringType
