

exception

```
classDiagram
    class exception {
    }
    class StackEmptyException {
    }
    exception <|-- StackEmptyException
```

The diagram illustrates a class hierarchy. At the top is a class box labeled 'exception', which is divided into three horizontal compartments. The top compartment contains the text 'exception', while the other two are empty. Below this is a class box labeled 'StackEmptyException', also divided into three horizontal compartments. The top compartment contains the text 'StackEmptyException', and the other two are shaded gray. A blue arrow with an open triangular head points from the top of the 'StackEmptyException' box to the bottom of the 'exception' box, indicating inheritance.

StackEmptyException
